Ship smarter. Land cheaper.

Global disruptions are driving up landed costs — we help you cut logistics costs and duties through smarter packing, shipping, and assembly.

Method 1

Flexible Production

Component for laser engraving

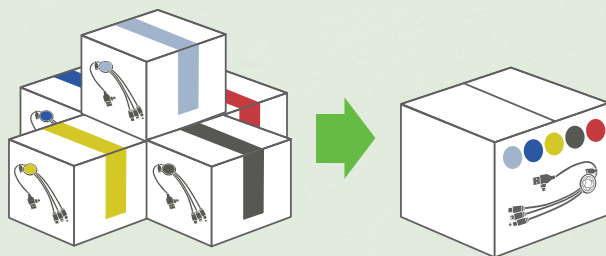

- Ship components instead of fully assembled products
- Enable flexible color, packaging, and SKU configuration
- Provide assembly training material

Download catalog

Result:

- ↓ Lower shipping cost
- ↓ Reduced stock holding risk
- ↑ More product variety
- ↑ Improved flexibility

Method 2

Packaging & Load Efficiency

Nested Packing for Gadget Pouch

Smaller pouches nested into larger pouch to maximize space efficiency

Helps reduce pallet Size
75%+

Before After

Big Item Vacuum Compression

Increase packing efficiency from 3 to 8 pieces /carton for big items like backpack

Minimize space by
62.5%

Vacuum Consolidation

Multiple small pouches are vacuum-packed into one master bag

Lowering import duties*

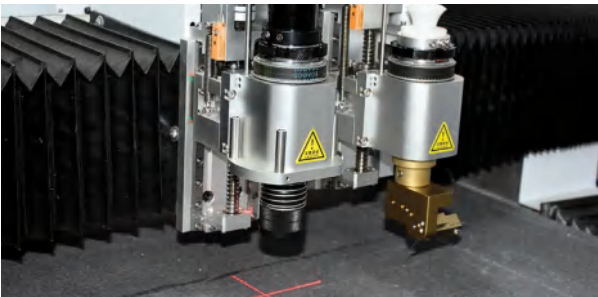

*where applicable

Result:

↑ More units per shipment ↓ Lower shipping cost per unit

Manufacturing Capabilities & Custom Development

We continue to invest in advanced manufacturing technology to improve quality, speed, and resource efficiency

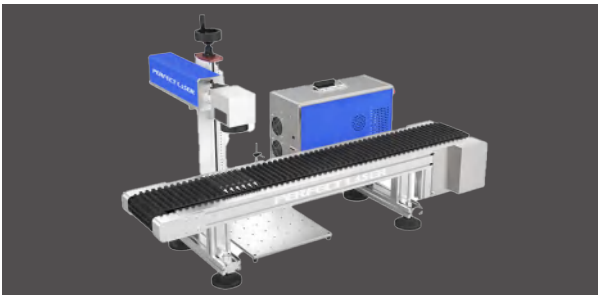

● **Digital Automatic Cutting Machine**

AI-driven precision up to 0.1mm, reducing material waste by 15%.

● **Hot Press Machine**

Ensures consistent durability and seamless finishes through controlled temperature bonding.

● **Automatic Laser Engraving Machine**

Delivers high-precision textures and logos with an eco-friendly approach.

● **Prototype, Mold Development & Small-Batch Production**

- New mold development to test product design
- Mock-up and prototype support before mass production
- Small-quantity customized orders for trial or market testing
- Flexible production planning to meet changing needs

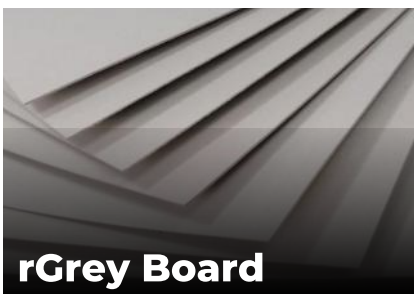

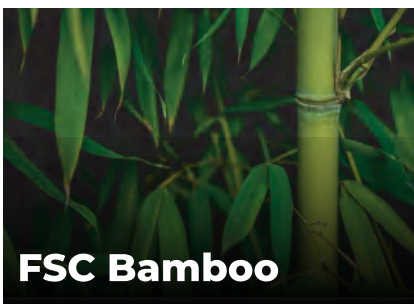

These advancements enable us to meet industry demands efficiently while maintaining high standards of quality and sustainability.

1P1-04

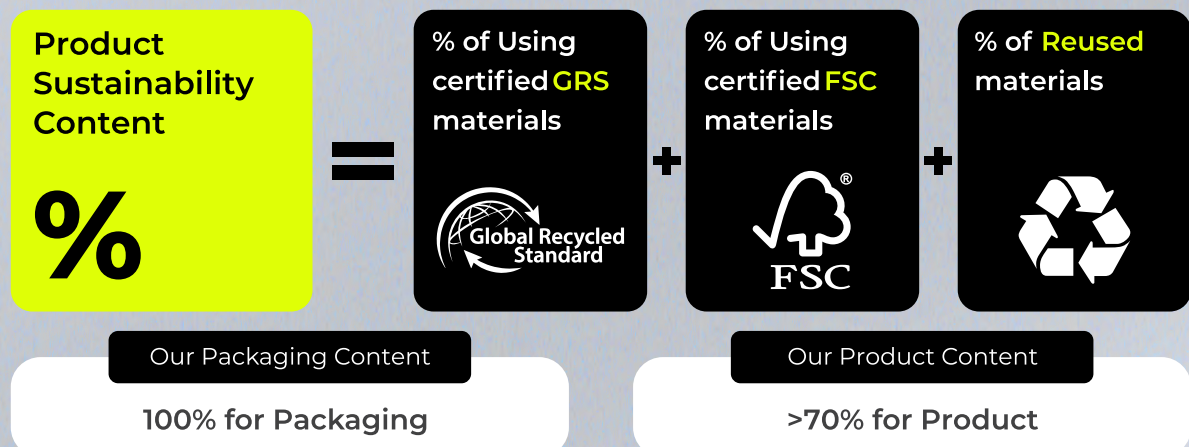

rMaterial

At PannexScien, we are committed to use r-Material in our products. Recycled material is any used or leftover stuff that are cleaned and turn into new material. Helping us save resources, use less energy, and cut down on waste going to landfills.

How We Calculate Sustainability Content %

Pannex Scien is a fully integrated manufacturer of custom corporate gifts and sustainable power technology, delivering from concept to global distribution. Our vertically integrated operations are supported by three strategic locations:

**10,000
WOMEN**

**GROWTH
FELLOWSHIP
2023**

2012

Pannex Scien is founded as a women-owned business, providing premium, customized solutions for the promotional gifts industry, with a focus on high-quality corporate and tech accessories.

2019

Our founder is selected for the **Goldman Sachs 10,000 Women Program**—a highly selective, globally recognized initiative that trains high-potential women entrepreneurs. This experience reshapes our business strategy toward **M2C (Made-to-Customer)** production, fully tailored to each client's needs.

2020

Amid the COVID-19 pandemic, Pannex Scien expands its M2C model into Thailand with local partners, achieving early success and becoming a registered supplier for Fortune 500 companies.

2024

We launch **CQLAR**, our sustainable tech accessories brand, made with high percentages of certified recycled materials and compliant with GRS, FSC, UL 2809, and BSCI standards—demonstrating our commitment to the circular economy.

**2025
&
Beyond**

Pannex Scien continues to innovate with patented products, smart gifting solutions, and integrated technologies such as NFC and anti-theft RFID, shaping the future of intelligent promotional gifts.

Pannex Scien and Our Commitment

"We allocate time, resources, and expertise to uphold these certifications, continually striving to reduce our environmental footprint, support responsible sourcing, and maintain fair working conditions across our supply chain. This ongoing commitment reflects our dedication to building a sustainable future—one gadget at a time."

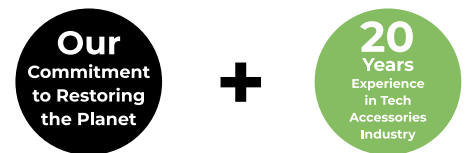

CQLAR by PANNEX SCIEN

CQLAR brings together 20 years of experience in the tech accessories industry and a strong focus on sustainability.

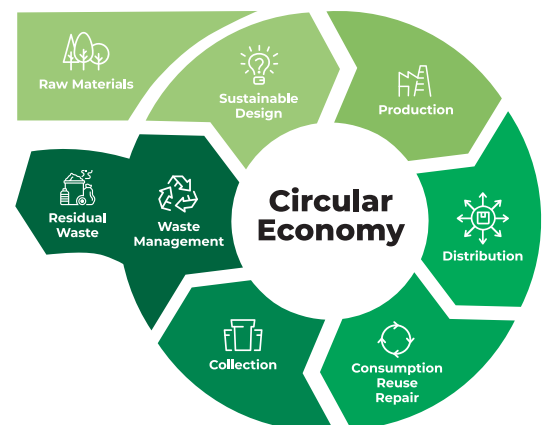

Inspired by the circular economy, CQLAR takes residual waste and turns it into certified recycled everyday items, showing that innovative design and responsible production can work together. It's also a real example of how Pannex Scien can provide customized solutions that align with our values.

CQLAR isn't just a brand—it's a step toward more sustainable craftsmanship

CQLAR

the certified recycle everyday items and total customized solutions.
